

Data Storytelling Techniques-AISC2004

Assignment-1

By
Nithish Janagam

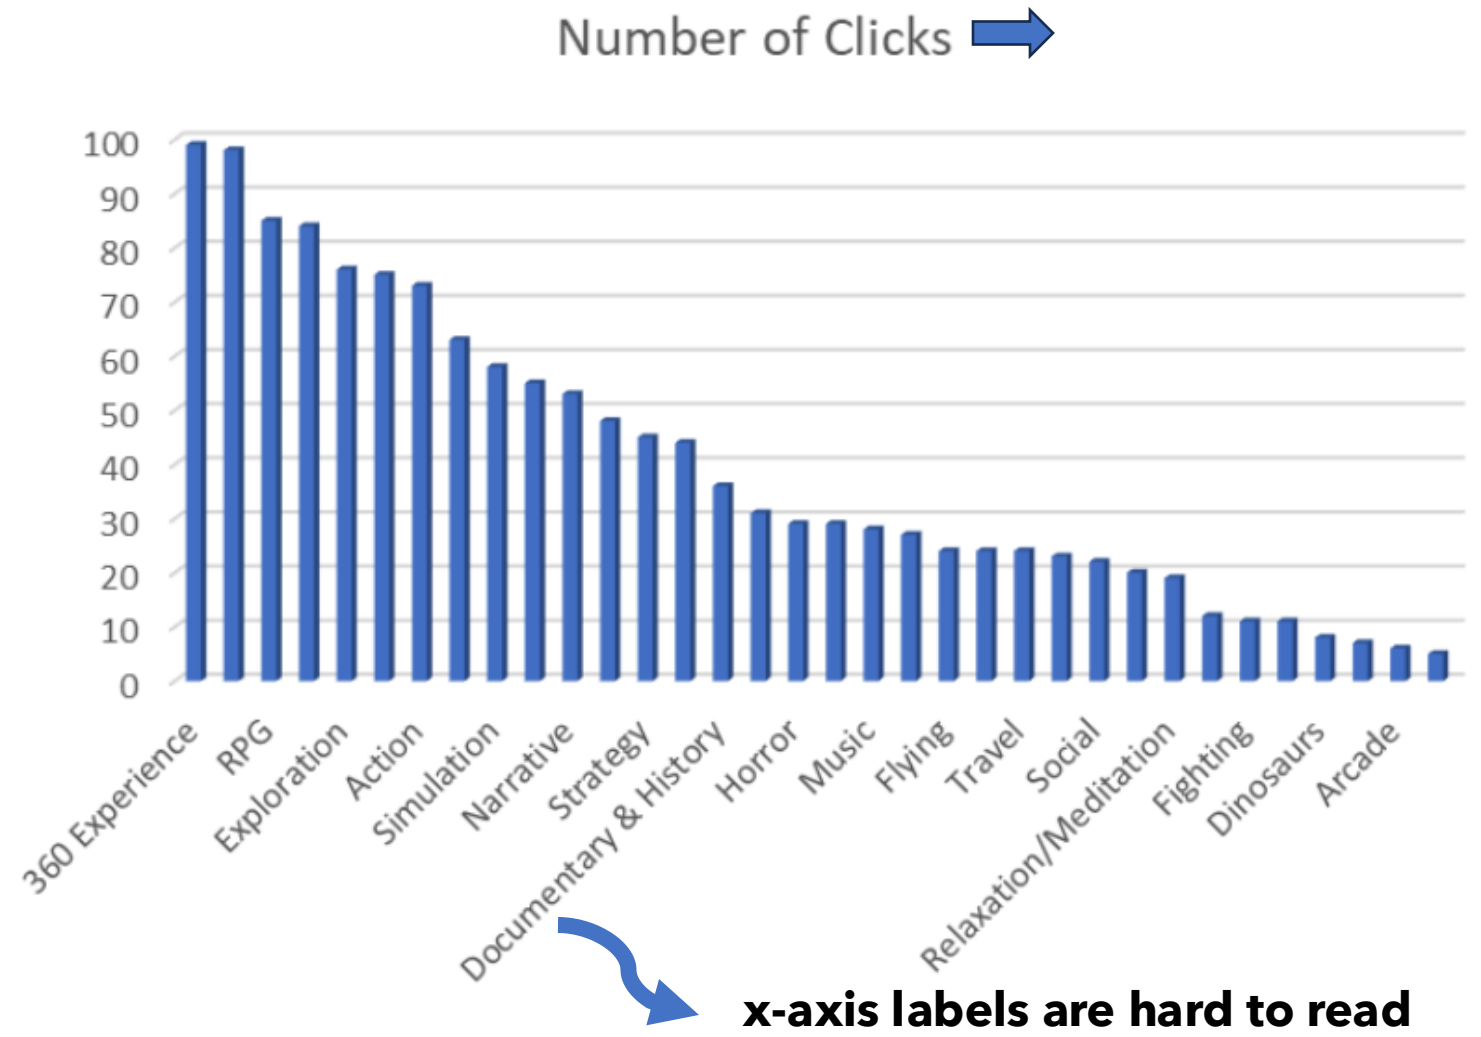

1. CO2 emissions by countries

1. Sort bars in descending order or ascending order.
2. Break down the "Other" category into more countries.
3. Provide more info, instead of just percentage, emissions in Tons would be more insightful.

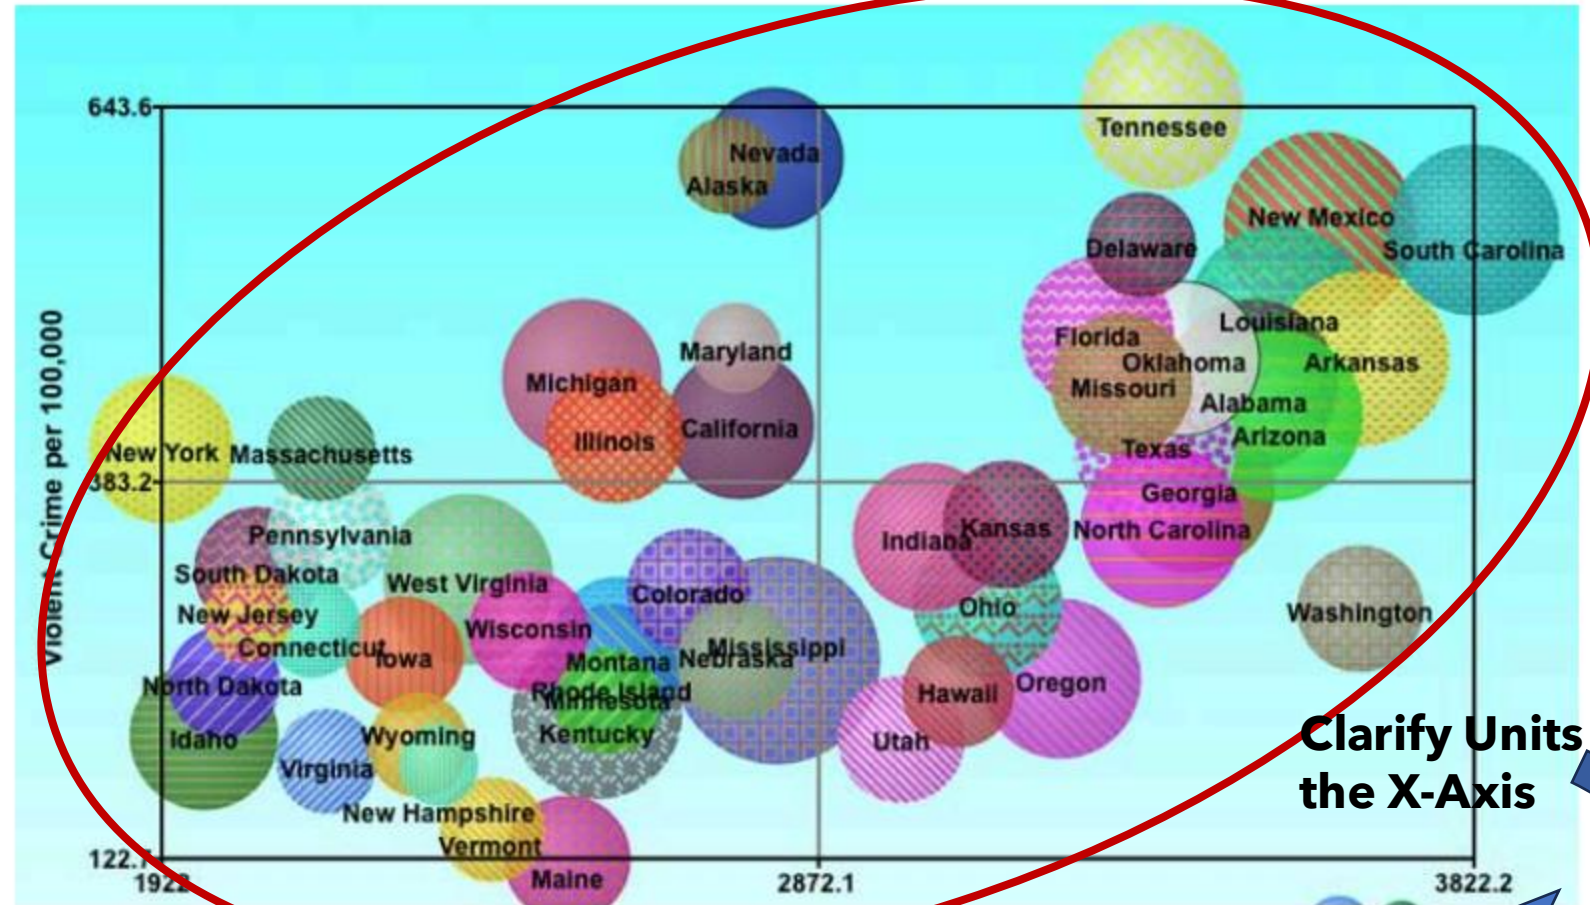

1. Use Horizontal bar graph for better readability.
2. Providing a clear title and axis labels would make it easier to understand the chart clearer.
3. Use preattentive attributes - Highlight the most clicked topic using a distinct color.

2. Number of clicks received by various topics

3. Crimes (Violent Crimes and Property Crimes) vs Number of ppl below poverty level

Many state names overlap, making it hard to read

Clarify Units on the X-Axis

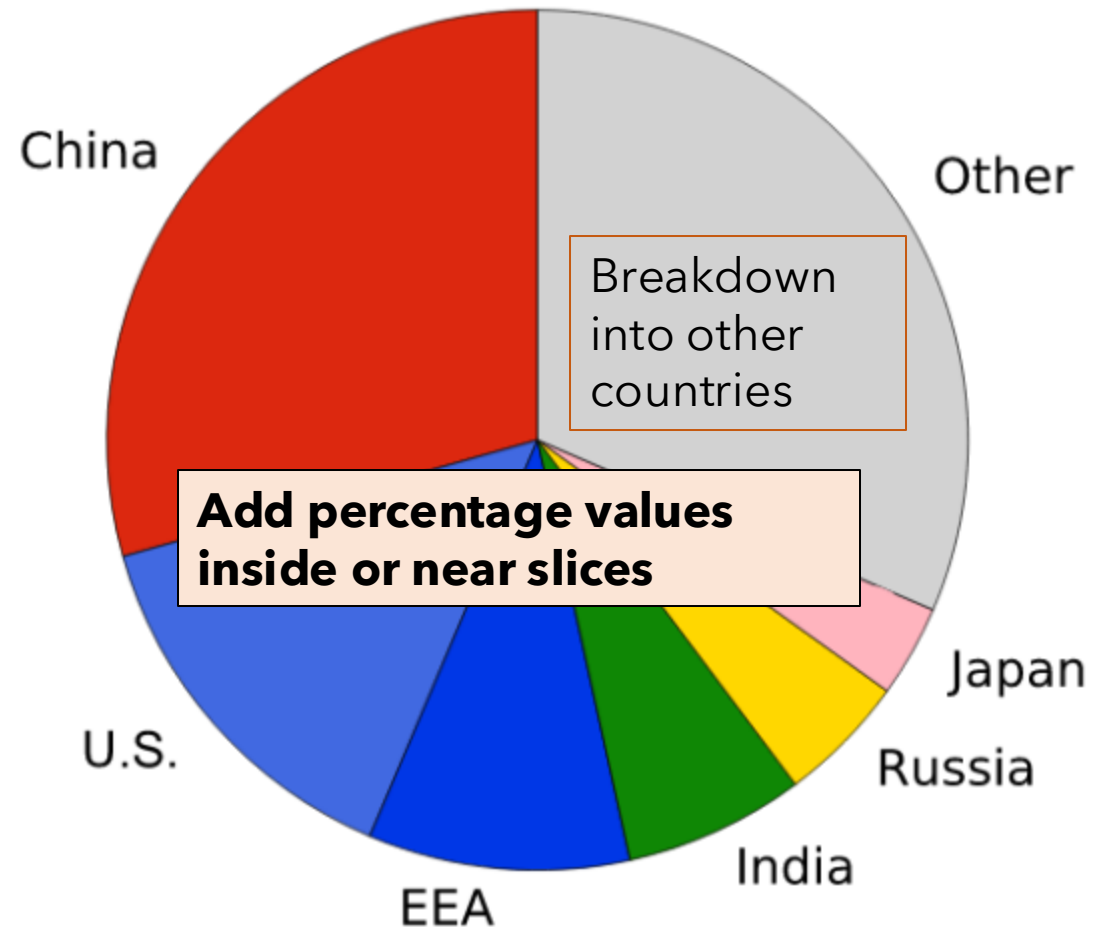

1. On X-axis, Specify whether it's thousands, millions, or per 100,000 people.
2. Using more different colors or border outlines would help in differentiating the states.
3. Or could use map chart and use colour saturation to indicate the poverty and a coloured numeric values to indicate the violent crimes and property crimes per 100k.

1. Adding numerical values at the top of the bars would give a clearer idea
2. The y-axis should start at zero for better understanding of the scale

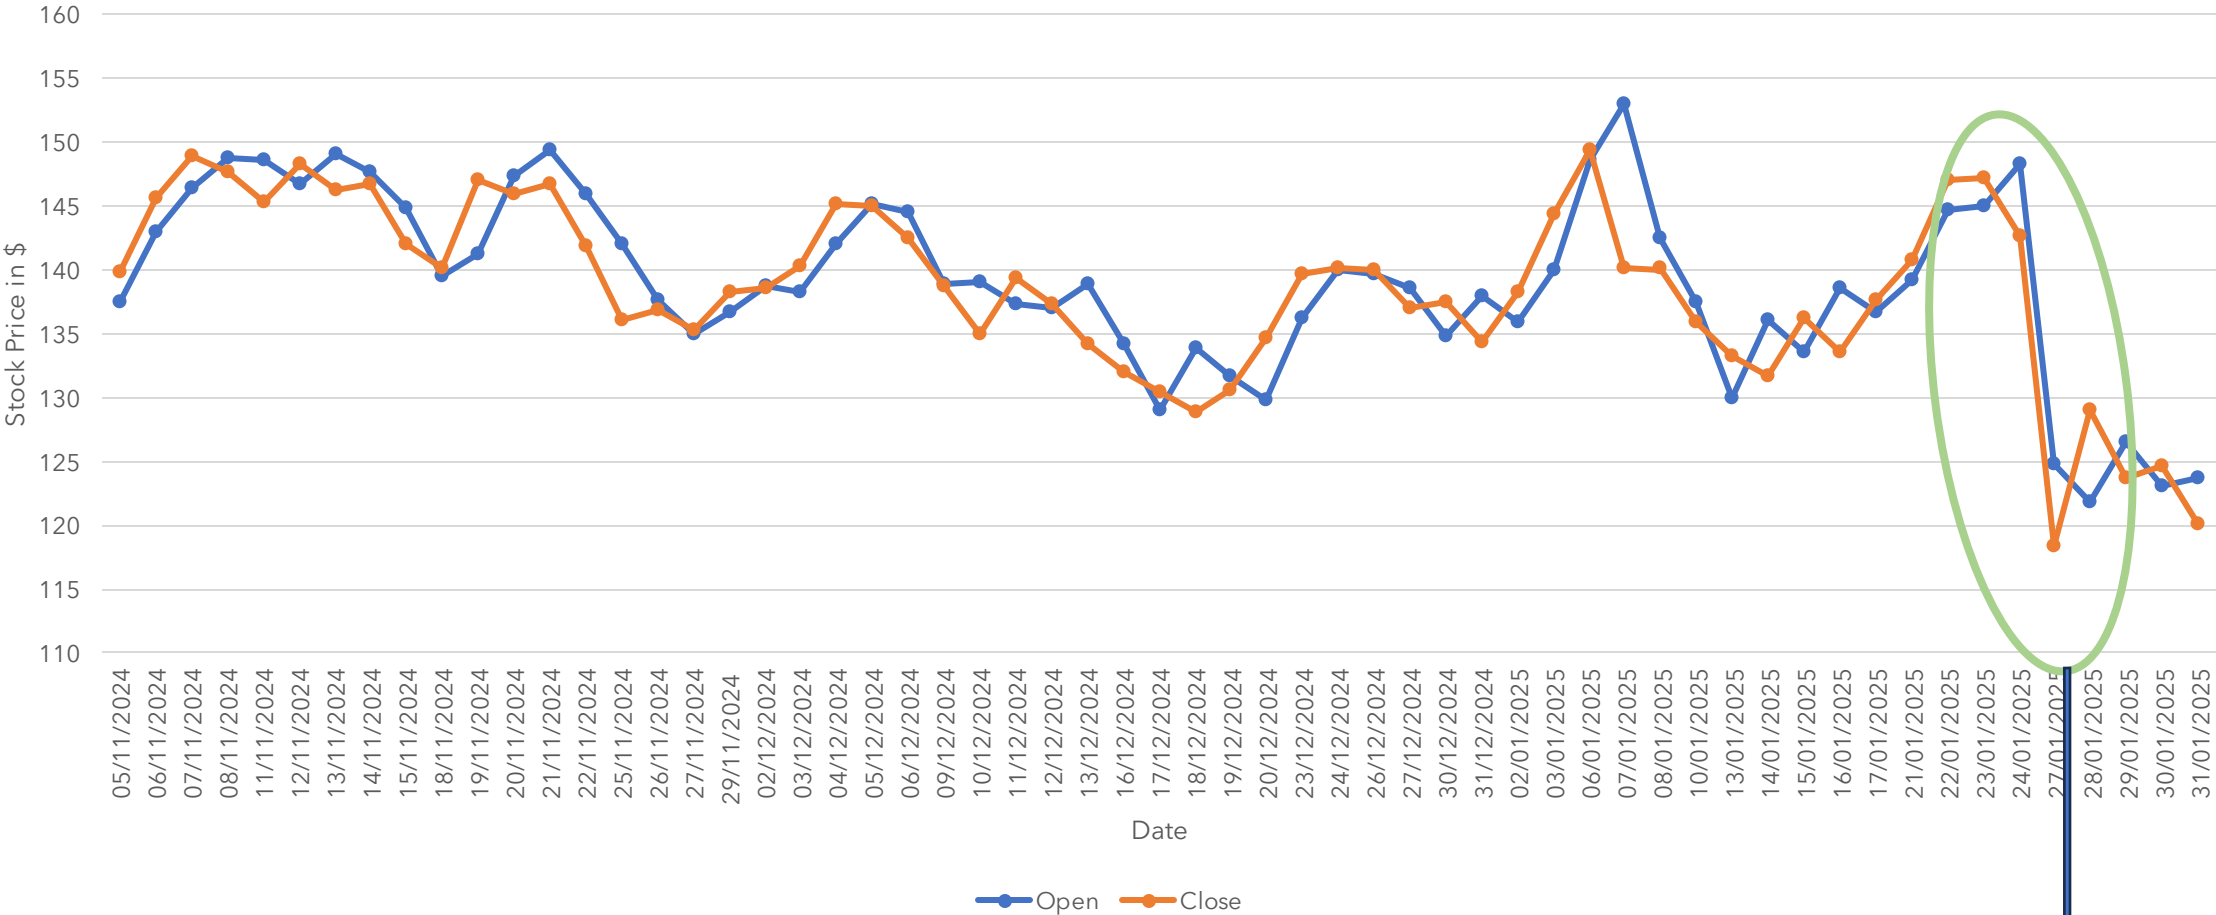

5. CO2 emissions by countries (optional for 9 ppl groups)

1. Adding percentage values inside or near slices would enhance clarity
2. The "Other" category takes up a large portion but lacks breakdown details.
3. A bar chart would provide a better comparison instead.

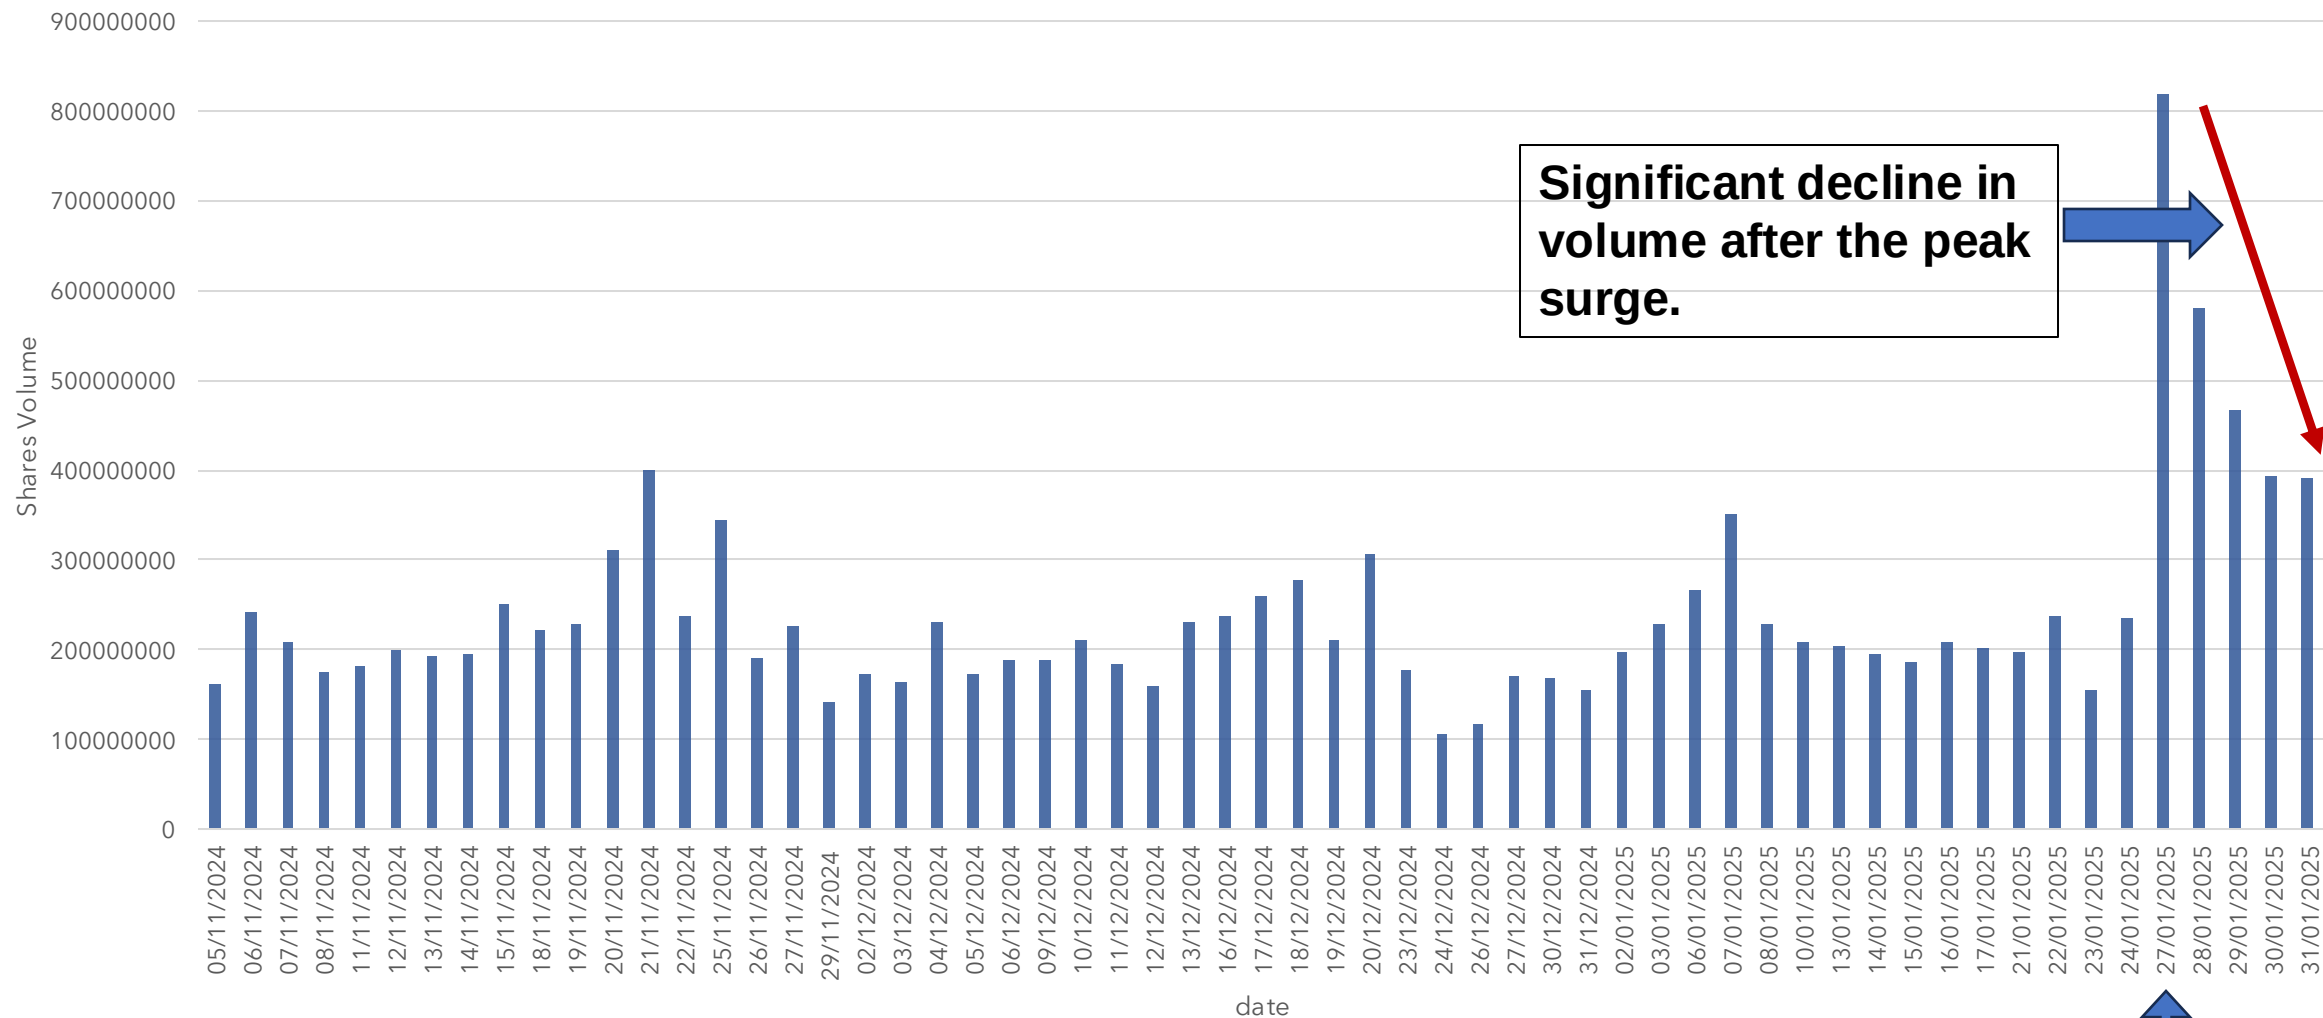

Stock Price Trends

On January 27, 2025, NVIDIA's stock experienced a sharp decline, losing approximately \$600 billion in market value, marking the largest single-day loss in its history.

Trading Volume Trends

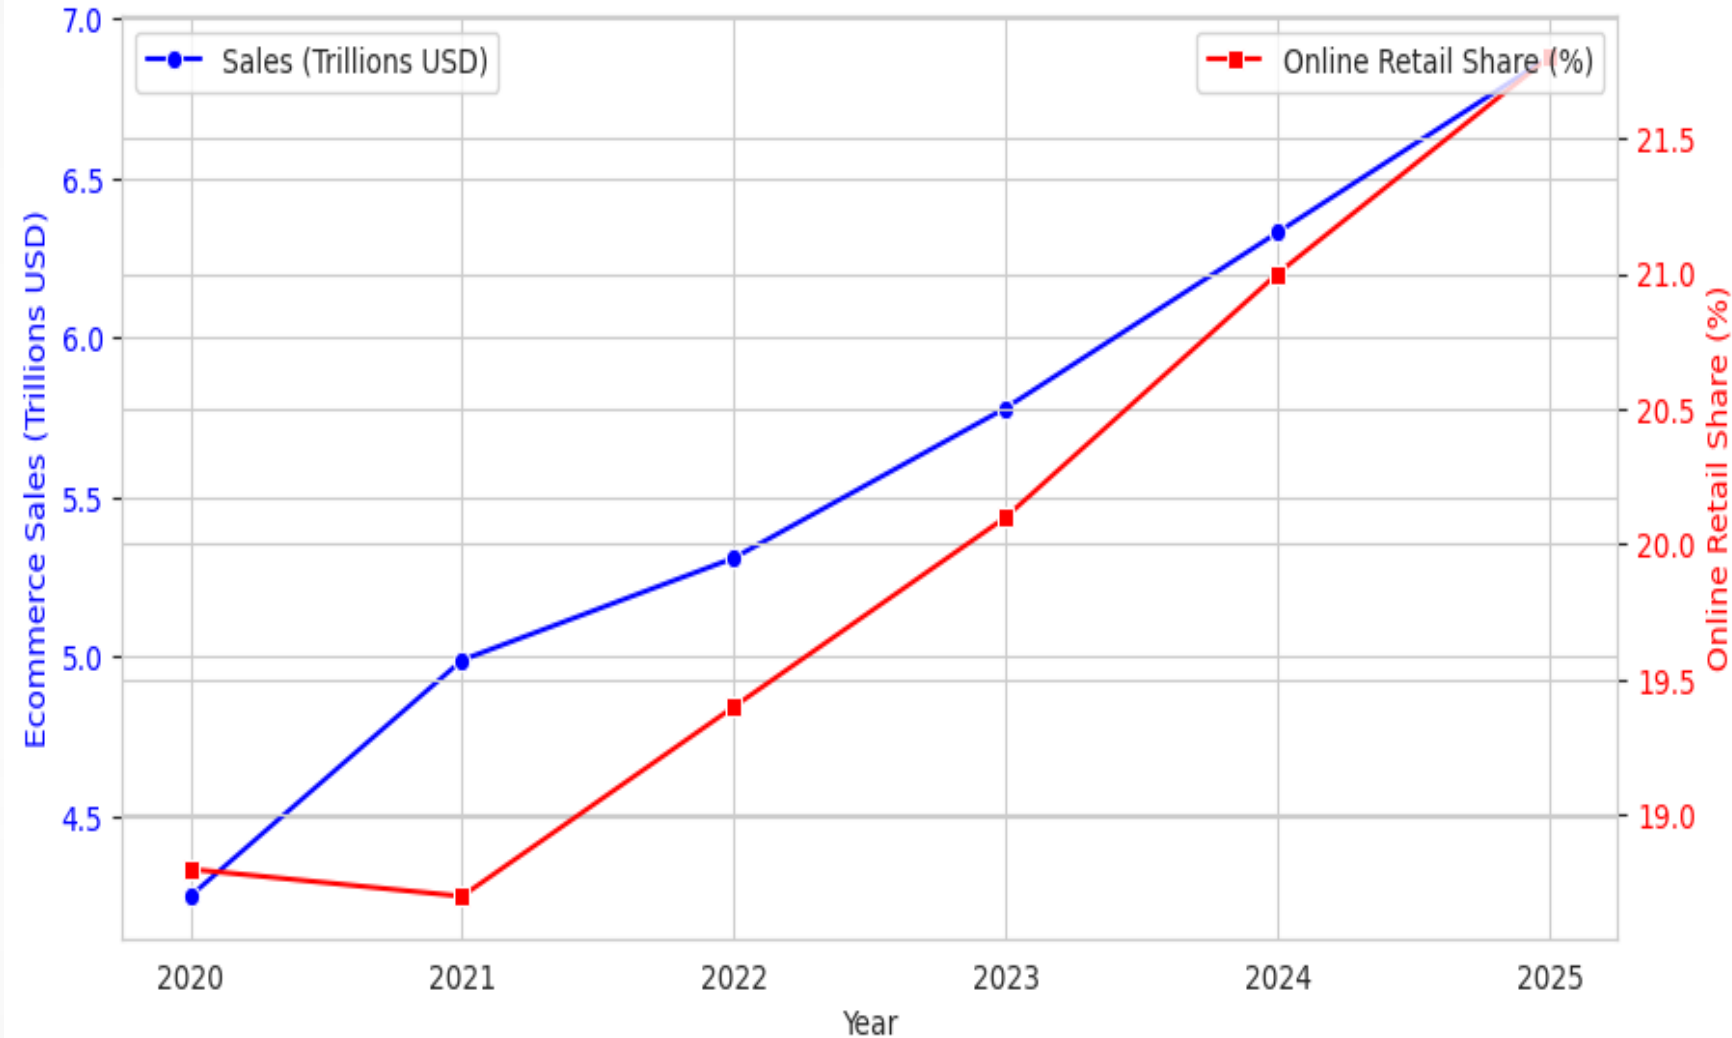

Significant decline in volume after the peak surge.

Highest trading volume recorded on January 27, 2025.

Ecommerce Adoption over last 5 Years

- Ecommerce sales grew from 4.4T USD in 2020 to 6.9T USD in 2025.
- Online retail share increased from 19% to 21.5% over the same period.
- Strong upward trend highlights the rise of digital shopping and ecommerce expansion.

Ecommerce Platform Market Share(2020-2024)

- Amazon shows a steady increase in market share, leading the sector.
- eBay's market share continues to decline, while Walmart remains stable.
- Alibaba and Shopify are experiencing gradual growth over the years.
- The "Others" category is shrinking, showing that the market is becoming more concentrated.
